## Fullstack Developer

Professional with high interest in continuous learning and career growth. Looking forward to working and growing alongside the company's goals, putting all my knowledge at disposal to achieve the best possible results. Currently focused on upskilling my Backend and DevOps knowledge to provide better solutions to our clients. Strongly believe in delivering only top quality results and robust project management and maintenance.

## Education

<b>BS</b>	<b>Instituto Tecnológico de Santo Domingo (INTEC)</b> , Mechatronics Engineering	Santo Domingo, DR
<b>Cert.</b>	<b>Zero To Mastery (ZTM)</b> , Programming Skills	Santo Domingo, DR
	<ul style="list-style-type: none"><li>• Complete Web Developer May 2022</li><li>• Data Structures and Algorithms July 2023</li><li>• React Developer October 2023</li><li>• NodeJS Dev September 2025</li><li>• SQL Databases October 2025</li></ul>	

## Experience

<b>Allways Forwarding</b> , Fullstack Developer	Santo Domingo, DR July 2024 – present
<ul style="list-style-type: none"><li>• Improved the notification system by allowing the users to directly interact with it and handle whatever was required with no page redirection, thus decreasing the time users had to spend handling what was needed. Additionally, shifted the logic behind the notification system to allow for many different types, improving scalability.</li><li>• Reconstructed the whole chat feature to facilitate complex client requests and made it more visually appealing. The goal was to shift our users from using external chats to our chat system and add features within the chat that allow the users to easily interact with our app and fulfill their needs.</li><li>• Collaborating in creating/improving our latest project so that our clients could use our system without the assistance of an employee. Creating a robust system that could handle many users with different approaches to manage USA imports/exports.</li><li>• Migrated a third party API's functionality to work internally in our system. Significantly decreasing the workflow time for our customers to require bonds and credits.</li></ul>	

## Projects

<b>Nasa Project</b>	Aug 2025
Retrieves habitable kepler exoplanets from a CSV file, schedule future launches to these exoplanets and retrieve past launches from a NASA API, stored with MongoDB. The project was containerized using docker and launched on AWS EC2.	
<ul style="list-style-type: none"><li>• Challenged myself to implement many different technologies such as AWS EC2, Docker, GraphQL, MongoDB and Moongoose.</li></ul>	
<b>E-commerce App</b>	July 2023
Online store app that uses Firebase's services to handle Authentication and Authorization. The main goal was to connect with their services and deploy on Vercel. Additionally, implementing React Context and React Router.	
<ul style="list-style-type: none"><li>• Learned about OAuth and JWT while using Firebase to handle it.</li><li>• Learned about React Context and React Router</li></ul>	

## Nintendo Website

June 2023

A simple copy of one of the many Nintendo Website's pages. Made to challenge myself and use all the FrontEnd knowledge at the time to build a complex page as such from scratch by just following the mock up.

- Implemented a bit of Jest

## Hard Skills

---

**Programming Languages:** Proficient with Javascript(Typescript), Good with PHP & Learning Python

**Frameworks:** React, Vue, Node, Express, Laravel

**Databases:** SQL, NoSQL, Redis

**Technologies:** Git, Github, Tailwind, APIs, Docker

**Languages:** English (fluent), Spanish (native)

## Soft Skills

---

**Time Management:** Properly prioritized assigned tasks based on client's needs and managed to deliver in a timely manner

**Quick Learner:** High capability of learning new concepts within a short time frame and apply them as needed

**Communication:** Best described as my active listening skill and hability to present information clearly and concisely

**Problem Solving:** Compared different solutions to a single problem in order to deliver the best possible outcome

**Critical Thinking:** Defined the most important prompts from the clients to understand what matters most, integrate and structure the information to later refine the result and ensure all requirements are met

**Teamwork:** Constantly interchanged ideas with my teammates to compare different approaches or suggest ideas

**Adaptability:** Quickly accommodated to the needs of unknown technologies for me at the time

## Interests

---

**Chess:** Like to play chess now and then

**Finance Books:** Currently reading finance books to develop my knowledge in the area
